GO PAPERLESS WITH CALIBER

Premium IT Solutions to
transform the way you work.

THE MONSTER IN YOUR LABORATORY

It is eating up your time and effort.

It is resulting in a compromise on your efficiency.

It is taking up all your space.

It is putting you under huge risk of data loss and non-compliance.

To add to all this, it is making you falter in front of your auditor.

There is a monster in your laboratory.

Paper!

WHY GO PAPERLESS?

Paper poses multiple threats in your organization. Data security, time loss, reduced efficiency, etc are just a few of the problems with paper. Going paperless, however, comes with numerous benefits:

- Lesser turn-around time
- Reduced transcription errors
- 80% better utilization of supervisor time
- Huge savings on paper records management expenses
- Ready platform for analytics & quality metrics
- Significantly reduced compliance risk
- More than 60% faster approvals
- Zero inter-department delays

Caliber's Paperless Informatics help you achieve your entity's goals and even exceed them. Our products work with your existing processes and enhance them without changing them. Discover your entity's true potential with Caliber's Paperless Informatics.

PAPERLESS INFORMATICS FROM CALIBER

CaliberLIMS

Caliber's Laboratory Information Management System handles all your laboratory data in a simple and efficient manner. It has the ability to manage your entire process in a well integrated solution without paper.

CaliberBRMS

The electronic Batch Record Management System eliminates paper in your manufacturing process and ensures that the entire process is documented, securely saved and always available for audit trails and reviews.

CaliberDMS

Our Document Management System helps you create a single centralized repository of all your documentation electronically, which makes it the perfect system for regulatory document management.

CaliberQAMS

The Quality Assurance Management System from Caliber is a highly configurable, workflow-driven process automation tool which helps in creation, review and approval of processes.
